COLLECTION DEVELOPMENT POLICY
FOR THE
COLLEGE OF EDUCATION

OVERVIEW

The primary mission of the College of Education, according to the undergraduate catalog, is "to develop skilled and competent teachers, administrators, counselors, school psychologists, speech and language clinicians, and other specialists for our schools." In addition, the College offers numerous programs leading to masters' degrees, a PhD in communicative disorders and sciences, and an EdD in educational administration. The Library's education collection is developed and maintained to support the diverse teaching and research needs of the faculty and students associated with the College of Education.

The College is comprised of four departments:
1) Administration, Counseling, Educational & School Psychology (ACESPI);
2) Communicative Disorders and Sciences (CDSI);
3) Curriculum and Instruction (CI); and
4) Health, Physical Education and Recreation (HPER).

Although the Department of Administration, Counseling, Educational & School Psychology offers some courses at the undergraduate level, it is primarily a graduate department offering programs leading to the Master of Education (MED) in counseling, educational psychology, and educational administration and supervision. This department also offers the Educational Specialist (EdS) in School Psychology and the Doctor of Education (EdD) in educational administration and supervision. There are sixteen faculty members.

There are fifteen faculty and professional staff members in the Department of Communicative Disorders and Sciences. At the undergraduate level the Department offers "broad, comprehensive and pre-professional preparation for specialized training" i.e., graduate level. It also offers an undergraduate minor. At the graduate level, both a Master of Arts (MA) and a Doctor of Philosophy (PhD) are offered. The Master's degree is the required degree for professional certification as a speech-language pathologist or audiologist in all employment settings, public schools, hospitals, rehabilitation agencies, clinics, etc. Areas of instruction include communication sciences, speech and language pathology, and clinical and rehabilitative audiology. The WSU Speech and Hearing Clinic is also affiliated with this department.
The Department of Curriculum and Instruction offers a "five-stage competency-based program beginning with an introduction to teaching and concluding with reflections on an extended student teaching experience." Undergraduate programs are offered for those seeking a Bachelor of Arts (BA) in education and the institution's recommendation for a teaching certificate. Graduate programs are offered leading to a Master of Education (MED) in Curriculum and Instruction and a Master of Education (MED) in Special Education (Mildly Handicapped). Twenty-four faculty members belong to this department.

The Department of Health, Physical Education and Recreation and its ten faculty members offer numerous degree programs in addition to its service program for the whole university. Undergraduate physical education majors may select the programs in teaching physical education (K-12), or the "field option specialization" (fitness or sports business). The fitness option "prepares students to help people of all ages and abilities to reach their fitness goals"; they are well prepared to pass the American College of Sports Medicine Fitness Leaders Certification Test. The sports business option combines a physical education with a business curriculum to prepare students for careers in athletic administration, sport programming, sport clubs, professional sport teams, sporting goods businesses, and sport governing organizations. Graduate programs leading to the Master of Education (MED) in Sports Administration or the MED in Physical Education (teaching and exercise science/wellness) are also offered.

**COLLECTION GUIDELINES**

Library materials for the Education Collection will be selected using the following guidelines:

a) **Languages.** English is the primary language of the collection. Although exceptions may be made, works written in other languages will ordinarily be purchased only in English translation.

b) **Chronological Emphasis.** Emphasis is on the twentieth century.

c) **Geographical Emphasis.** Primary emphasis is on the United States; secondary emphasis is on other geographical areas such as Western Europe, USSR, Asia, the Middle East, Latin America, and Sub-Saharan Africa.

d) **Subject Treatment.** Works on the history and theory of educational development in all its aspects will be collected on a broad
basis. The legal, political, and administrative aspects of education, as well as research methodology reflect strong collecting interests. Medical material is important as it relates to the Communicative Disorders program, and will be collected selectively in the sports medicine and special education areas. Educational biographies, juvenile literature, popular works, and textbooks will be collected selectively.

e) Types of Materials. All standard print forms of reference material will be collected, as will publications of professional organizations (including conference proceedings). Government documents are acquired comprehensively. The complete Educational Resources Information Center (ERIC) microfiche depository is available. In addition to the print indexes to this collection a CD-ROM station with the ERIC database is available. All theses and dissertations from WSU are collected; theses and dissertations from other institutions are collected only selectively in either print or microform. In general, non-print resources will be acquired selectively upon faculty request.

f) Date of Publication. Emphasis is on current materials. Retrospective purchasing will be very selective.

g) Other Considerations. The College of Education also draws upon the resources of other disciplines for subject-matter teaching resources as well as such subjects as government, philosophy, history, anthropology, psychology, law, and business.

COLLECTION DEVELOPMENT POLICY
FOR THE
COLLEGE OF EDUCATION

OVERVIEW

The primary mission of the College of Education, according to the undergraduate catalog, is "to develop skilled and competent teachers, administrators, counselors, school psychologists, speech and language clinicians, and other specialists for our schools." In addition, the College offers numerous programs leading to masters' degrees, a PhD in communicative disorders and sciences, and a choice of EdS or PhD in educational administration available in cooperation with The University of Kansas. The Library's education collection is developed and maintained to support the diverse teaching and research needs of the faculty and students associated with the College of Education.

The College is comprised of six departments: 1) Communicative Disorders and Sciences (CDS); 2) Counseling, Educational and School Psychology (CESP); 3) Curriculum and Instruction (CIL); 4) Educational Administration and Supervision (EAS); 5) Health, Physical Education and Recreation (HFPER); and 6) Industrial Technology (ITec). There are eighteen faculty members in the Department of Communicative Disorders and Sciences. At the undergraduate level the Department offers "broad, comprehensive and preprofessional preparation for specialized training." It also offers an undergraduate minor. At the graduate level, both a Master of Arts (MA) and a Doctor of Philosophy (PhD) are offered. The master's degree is the required degree for professional certification as a speech-language clinician or audiologist in the public schools or hospital clinics. Areas of instruction include communication sciences, speech and language pathology, and clinical and rehabilitative audiology.

The Department of Counseling, Educational and School Psychology offers courses at the undergraduate level, as well as programs leading to the Master of Education (MEd) in counseling, the MSc in educational psychology and the Specialist in Education (EdS) in counseling. This department is made up of ten faculty members.

The Department of Curriculum and Instruction offers basic teacher education programs. Undergraduate programs are offered for those seeking a Bachelor of Arts (BA) in education and the institution's recommendation for a teaching certificate. Graduate programs are offered leading to a Master of Education (MEd) in Elementary or Secondary Education and to a Master of Science Education (MSE) for secondary teachers in the sciences. Twenty faculty members belong to this department.

The Department of Educational Administration and Supervision is primarily a graduate department offering programs leading to the Master of Education (MEd) in educational administration and supervision, as well as a Specialist in Education (EdS). It is also
through this department that a student can earn a Doctor of Philoso-
phy or Doctor of Education in cooperation with The University of
Kansas. There are eight faculty members in the Department.

The Department of Health, Physical Education and Recreation
and its eleven faculty members offer numerous degree programs in
addition to its service program for the whole university. Under-
graduate physical education majors may select the programs in
elementary or secondary education, or the "field option specializa-
tion" (fitness or sports business). They can earn state certifica-
tion in Health or WSU certification in Coaching. Recreation majors
can emphasize management of leisure services with specialties in
therapeutic recreation, park, and community. Graduate programs
leading to the Master of Education (MEd) are offered, with special-
ties in Sports Administration and Exercise Science/Wellness as
well.

Finally, the Department of Industrial Technology offers an
undergraduate minor as well as a Bachelor of Science degree program
designed to build upon technical specialties (e.g., construction,
computers, drafting, etc.) developed at a community college or
technical institute. The Department also offers a graduate program
leading to the Master of Education (MEd). There are four faculty
members in this department.

COLLECTION GUIDELINES

Library materials for the Education Collection will be
selected using the following guidelines:

a) Languages. English is the primary language of the col-
lection. Although exceptions may be made, works written in
other languages will ordinarily be purchased only in English
translation.

b) Chronological Emphasis. Emphasis is on the twentieth cen-
tury.

c) Geographical Emphasis. Primary emphasis is on the United
states; secondary emphasis is on other geographical areas such
as western Europe, USSR, Asia, the Middle East, Latin America,
and Sub-Saharan Africa.

d) Subject Treatment. Works on the history and theory of edu-
cational development in all its aspects will be collected on
a broad basis. The legal, political, and administrative as-
pacts of education, as well as research methodology reflect
strong collecting interests. Medical material is important as
it relates to the Communicative Disorders program, and will be
collected more selectively in the sports medicine and special
education areas. Educational biographies, juvenile litera-
ture, popular works, and textbooks will be collected selec-
tively.
e) Type of Materials. All standard print forms of reference material will be collected, as will publications of professional organizations (including conference proceedings). Government documents are acquired comprehensively. The complete Educational Resources Information Center (ERIC) microfiche deposit is available. In addition to the print indexes to this collection a CD-ROM station with the ERIC database is available. All theses and dissertations from PSU are collected; theses and dissertations from other institutions are collected only selectively in either print or microform. In general, non-print resources will be acquired selectively upon faculty request.

f) Date of Publication. Emphasis is on current materials. Retrospective purchasing will be very selective.

g) Other Considerations. The College of Education also draws upon the resources of other disciplines for subject-matter teaching resources, as well as such subjects as government, philosophy, history, anthropology, psychology, law, and business.
