

Instructions for downloading EndNote

Windows Installation

- Login to your **myWSU** account <<http://mywsu.wichita.edu/cp/home/loginf>>
- Under the **Student Tools** heading on the left-hand side of the screen, click on **myTools**
- Under the **General** heading on the left-hand side of the screen, click on **Download EndNote**
- If a **Security Information** window appears, click on **Yes**
- Under **Windows Installation**, check to make sure your computer meets the system requirements by clicking on the link under **System Requirements**
- Close all other programs you may have open
- Click on the [endnoteX2.zip](#) link on the screen
- At the **File Download** screen, click on **Save** and save the file to your **desktop** (you can delete it later)
- When the **Download complete** box appears, click on **Open**
- Click on the [Extract All Files link](#) on the left side of the screen, or the **Extract** button in the toolbar (this varies depending upon your zip program) -- **do not** click on the **ENX2nst** icon at this point

- Follow the steps in the **Extraction Wizard**, accepting the defaults as you go
- After clicking on the **Finish** button (the final step of the Extraction Wizard), **now** you can click on the icon for EndNote X2 installation – **ENX2Inst**

- If an **Open File – Security Warning** box appears, click on **Run**
- Click through the next series of screens to begin the installation
- The installation may take some time—a large number of files will be downloaded
