Wichita State University Libraries
New Features of Audio books, Music, and More!

There are many new and exciting changes that have occurred in regards to the Audio books, music, and more! digital catalog.

**myWSUid**
You can use your myWSUid and password to check out items from the digital catalog. You no longer need a Kansas Library Card.

**MP3 files**
In July 2008 digital videos and MP3 files which play on virtually any MP3 player including the iPod® and the Zune® were added. To see if your MP3 player is compatible check the “Compatible Devices” link on the main page or go to [http://www.overdrive.com/resources/drc/compatibledevices.aspx](http://www.overdrive.com/resources/drc/compatibledevices.aspx)

**Wish List**
Add titles to the “Wish List” while browsing through the digital catalog. Titles will remain in the “Wish List” until you remove them.

**Recommended Titles**
While viewing a title details page, a new section labeled “If you like this title, then you will love...” will also be displayed. The titles chosen for display are those that have one or more of the following in common with the title on the page: Creator(s), Publisher, Imprint, Keywords.

**Search by Awards**
Using the Advanced Search, you can search by more than 60 awards. Additionally, if a title has received an award, this is displayed on the title details page. There is a hyperlink on the title details page to display a list of titles that have received the same award.

**Full Text Searching**
The quick search now supports full text searching. Full text searching queries the Title, Publisher, Creator, ISBN, Subject, and Publisher-supplied Keyword fields.

**Edit Email Address on Current Holds**
If you change your email address during the waiting time for a title you have on hold, you now have the option to update it in you’re My Account.
